Hiring Manager
Capco

Dear Hiring Manager,

I am writing to express my strong interest in the AI Business Analyst position within Capco's Capital Markets practice, as advertised. My background directly bridges the gap between emerging AI capabilities and practical business outcomes. With an MSc in Artificial Intelligence from Imperial College London and an MBA in Finance & Analytics from the University of San Francisco, I combine hands-on AI project delivery with the financial strategy and stakeholder management skills essential for translating complex technical concepts into measurable business value.

My experience in data-driven financial strategy and AI product development maps directly to your requirements. As a Financial Strategy Project Team Lead at MRLI, I led a cross-functional team through a discovery engagement, analysing three years of financial data to surface cost-structure inefficiencies and deliver strategic recommendations that identified up to \$72,000 in retained earnings—demonstrating the stakeholder management, requirements gathering, and analytical rigor central to your role. Concurrently, my AI projects at Imperial—including building a generative-AI augmentation pipeline for medical imaging and shipping an AI-driven mobile app with uncertainty-aware recommendations—provide concrete evidence of my ability to work with AI engineers, evaluate model trustworthiness, and navigate the governance and risk considerations of responsible AI adoption.

I am excited by the opportunity to help Capco's Capital Markets clients turn AI opportunities into scalable solutions, and I am confident that my ability to facilitate workshops, translate technical AI concepts into business outcomes, and support Agile delivery programmes will allow me to contribute immediately. Thank you for considering my application. I look forward to the possibility of discussing how my skills and experience align with the needs of your team.

Sincerely,

Priyam Rai
